DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: In Table 1, pages 7-8, the paths listed does not correspond to the paths shown in Figure 3. For example, Table 1 Path 1 L64.0 → L32.1 → L16.1 → L8.1. However, in Figure 3, the path 1 should be L64.0 → L32.0 → L16.0 → L8.1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4, 7-9 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, lines 3 and 5, "the requirements of users" lack a proper antecedent basis to claims 3/1 since "requirement" first appears in claim 2.

Regarding claim 7, lines 5-6 and 7-8, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claim 8, line 3, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 2663

Claim 9, lines 4-5, "the requirements of the users" lacks a proper antecedent basis to claims 7/6/1. See claim 2.

Claim 11, line 3, "(Table 1)" renders the claim indefinite because it is unclear whether the limitation inside the parenthesis are part of the claimed invention.

Allowable Subject Matter

4. Claims 1-3, 5, 6, 10 and 12 are allowed.
5. Claims 4, 7-9 and 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
6. The following is a statement of reasons for the indication of allowable subject matter: the particular method of allocating transmission resources including the classification of logged on users into classes representative of their contracts, the allocation of transmission resource to the user in the process of communication in compliance with their class, and organization of the classes in a scanning cycle wherein the frequency at which each class appears in the cycle follows a geometrical progression.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art are subsequently filed patent documents that teach the use of trees to organize the scheduling of users.
